Web App for Private Accommodation Reservations
Project Seminar
User Documentation

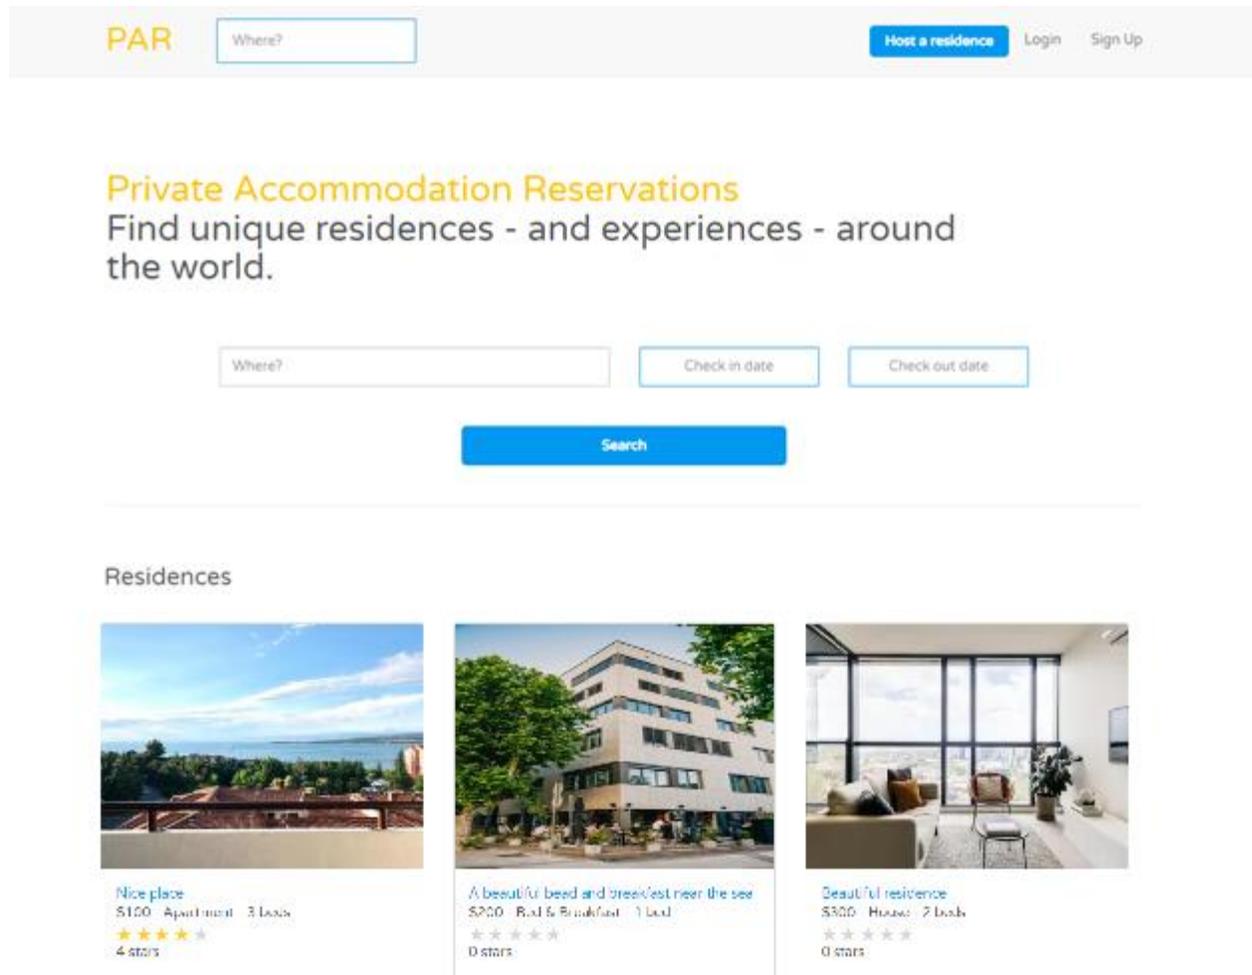

University of Primorska

Faculty of Mathematics, Natural Sciences and Information Technologies

July 2022

This document is the user documentation for the Web App for Private Accommodation Reservations (PAR). PAR is a web application that hosts an online marketplace for lodging, primarily for offering and renting of vacation homestays. The users are able to register and customize their profiles, to create and display their residence offers, and to rent the offers of other users. Users search for offers by location, by specifying constraints regarding the timeframe, cost, and amenities, and are able to use a map.

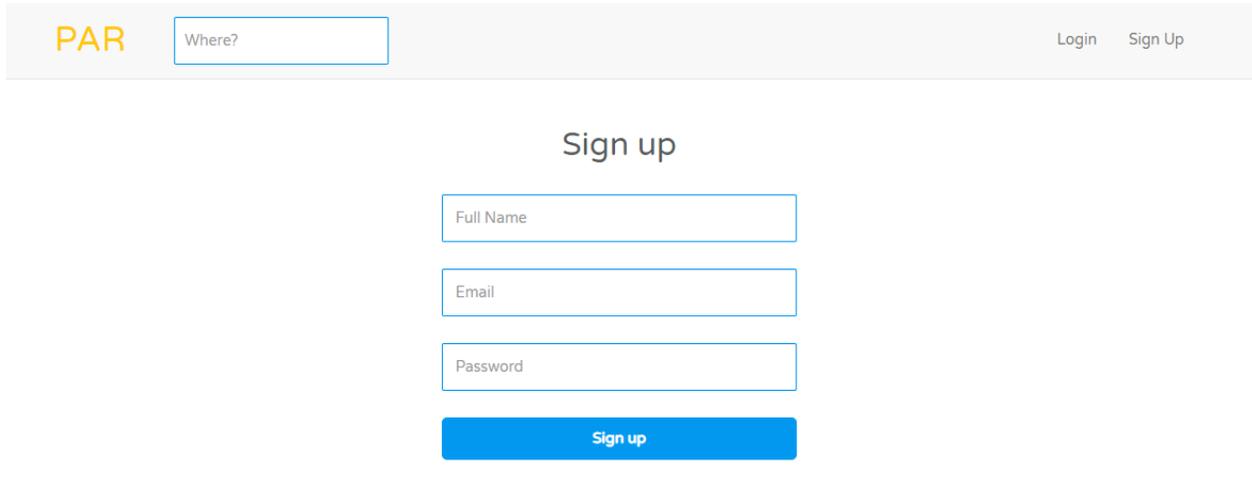

A user first opens the home page, from which they can log in, sign up, or browse the residences.

The application uses the standard registration and authentication protocol. A user signs up by providing their full name, which other users are able to see, their email, and a password. The user stays signed in after signing up. Alternatively, if a user already has an account, they simply log in. A registered user may have a profile that they can edit and that can be used to show information to other users. A user specifies their name, contact information such as phone number and email, and

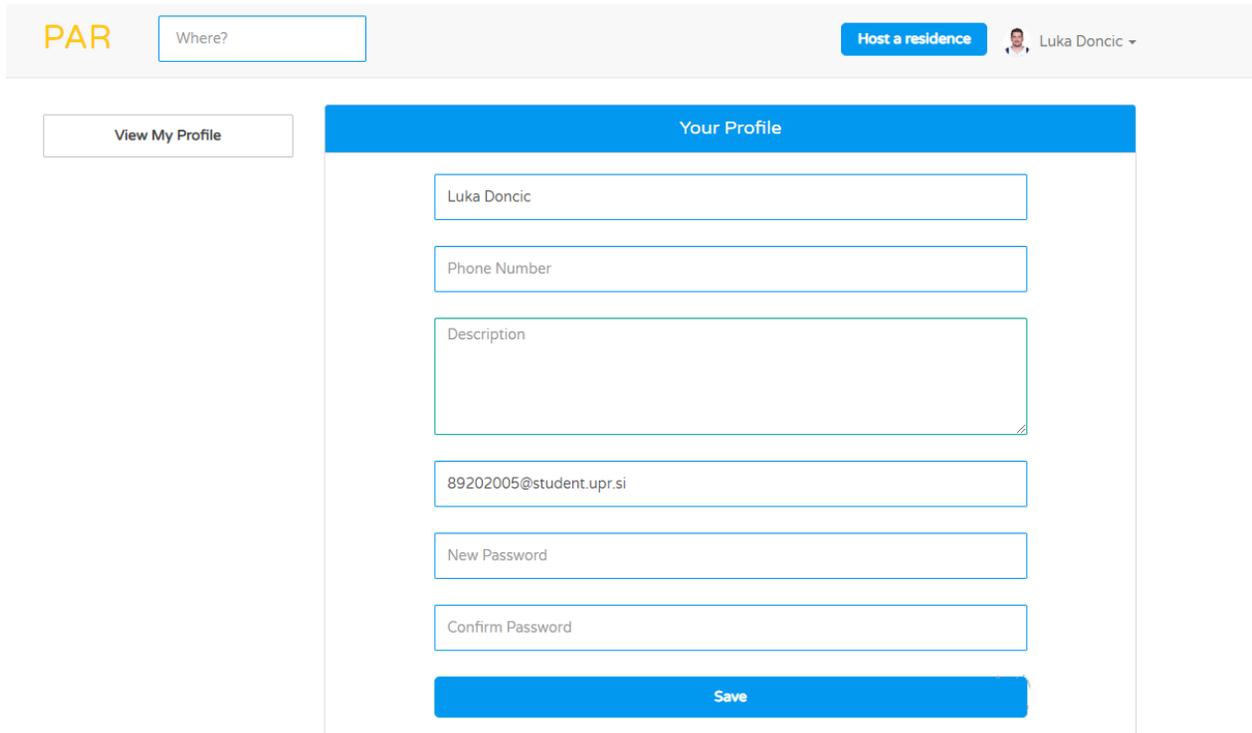

description, where they can provide additional details. Before submitting the changes to their profile, a user is required to confirm their current password.

Signing up:

The sign up form is located in a light gray header bar. On the left is the 'PAR' logo in yellow. Next to it is a search box with the placeholder text 'Where?'. On the right side of the header are the links 'Login' and 'Sign Up'. Below the header, the title 'Sign up' is centered. The form consists of four input fields: 'Full Name', 'Email', and 'Password', each with a light blue border. Below these fields is a solid blue button with the text 'Sign up' in white.

Editing the user's profile:

The profile editing form is shown in a light gray header bar. On the left is the 'PAR' logo. Next to it is a search box with 'Where?'. On the right, there is a blue button labeled 'Host a residence', a user profile icon, and the name 'Luka Doncic' with a dropdown arrow. Below the header, there is a 'View My Profile' button on the left. The main content area is titled 'Your Profile' in a blue header. It contains several input fields: 'Luka Doncic', 'Phone Number', 'Description' (a larger text area), '89202005@student.upr.si', 'New Password', and 'Confirm Password'. At the bottom of this section is a solid blue button labeled 'Save'.

Clicking on “View My Profile” takes the user to their profile:

The screenshot shows the user profile for Luka Doncic. At the top, there is a navigation bar with the PAR logo, a search box labeled "Where?", a "Host a residence" button, and the user's name "Luka Doncic" with a dropdown arrow. The profile section includes a profile picture of Luka Doncic, a "Verification" badge with the phone number "012 345 678", and a list of three residences. The first residence is titled "Nice place", priced at \$100, an apartment with 3 beds, and a 4-star rating. The second is "A beautiful bead and breakfast near the sea", priced at \$200, a bed & breakfast with 1 bed, and a 0-star rating. The third is "Beautiful residence", priced at \$300, a house with 2 beds, and a 0-star rating. Below the residences, there are two reviews from guests, with the first one dated 18-JUL-2022 and rated "Excellent!".

Clicking on the dropdown near the user’s icon in the navigation bar and selecting “Your residences” leads the user to the list of all their residences.

The screenshot shows the "Your Residences" management page. The navigation bar is identical to the previous screenshot. On the left, there is a sidebar with the following options: "Your Residences", "Host Reservations", and "Your Vacations". The main content area is titled "Residences" and contains a list of three residences, each with a thumbnail image, a title, and an "Update" button. The first residence is "Nice place", the second is "A beautiful bead and breakfast near the sea", and the third is "Beautiful residence".

By clicking on the “Host a residence” button in the navigation bar, or alternatively from the navigation bar dropdown menu, the user opens the form for creating a news residence offer:

The screenshot shows the top navigation bar with the PAR logo, a search input field containing "Where?", a "Host a residence" button, and a user profile for "Luka Doncic". Below the navigation bar is a blue header for "Host a new residence". The form contains four dropdown menus: "Residence Type" (set to "Apartment"), "Number of guests" (set to "1"), "Bedrooms" (set to "2"), and "Bathrooms" (set to "1"). A blue "Create" button is positioned at the bottom left of the form.

Once a residence is created, the user may input the different properties of the residence, such as the price, photos, amenities, and address, through separate windows which are accessed on a bar to the left of the window. Until the price, address, photos and the description are set, the button “Host” is disabled, once they are set the button is enabled and the user can start hosting the residence.

The screenshot shows the "Photos" configuration window. On the left is a sidebar with a checklist: "Residence", "Pricing", "Description", "Photos", "Amenities", and "Address", each with a green checkmark. Below the sidebar is a blue "Host" button. The main content area has a blue header "Photos" and a "Select Photos" button. Below that is an "Add Photos" button. Two photo thumbnails are displayed, each with a trash icon at the bottom right.

The user is able to search for residences, either from the home page or from the navigation bar. Once they do, a page opens where they can specify additional filters, such as the price range, start and end date, amenities, etc. A map is displayed showing the residences near the entered location.

The screenshot displays the PAR website's search interface. At the top left, the logo 'PAR' is visible next to a search input field containing the text 'koper'. To the right of the search bar, there is a 'Host a residence' button and a user profile icon for 'Luka Doncic'. Below the search bar, a 'More filters' button is present. The main filter section includes a 'Price range' slider with 'Min Price' set to 100 and 'Max Price' set to 500. Below the price range, there are input fields for 'Start Date' and 'End Date'. Further down, there are three dropdown menus for 'Accommodate', 'Bedrooms', and 'Bathrooms', each with a 'Select...' option. At the bottom of the filter section, there are checkboxes for 'TV', 'Heating', 'Kitchen', 'Air Conditioning', and 'Internet'. A blue 'Search' button is located below the filter section. To the right of the filter section, a map of Koper is displayed, showing the city layout and a blue location pin. The map includes labels for 'Marina Koper', 'Pobriški terminal', 'Izotška vrata / Porta Isotiana', 'Vojkovo nabrežje / Riva', 'Palata Srednjaška', 'Il portate del palazzo', and 'descovite'. At the bottom of the map, there is a watermark that reads 'Activate Windows' and 'Go to Settings to activate Windows'.

The user selects a residence to view, and can then make a reservation.
